ATTENTION: City Officials are considering an expensive & unprecedented mandate which would reduce funds available for public benefits.

Dear xxxxx,

We need your help today to ensure the future of the Alexandria Waterfront at Robinson Terminal South! City decision-makers are considering an extraordinary and expensive requirement that material be brought to and from Robinson Terminal South by barge.

Currently, the pier is not capable of berthing a material barge or supporting the weight of fully loaded trucks to haul the materials between a barge and the site. However, we asked our marine engineers and contractors to develop and price a plan for moving dirt to and from Robinson Terminal South via barge. They

determined that using barges would be 40% more expensive than using trucks and would take 33% longer.

Most important, the result of this unprecedented requirement would be a loss of more than \$1.5 million for public benefits such as revitalizing the pier or building the waterfront promenade.

Stand with us and let City Officials know that we are at a pivotal moment to revitalize the waterfront, and barging would threaten our shared vision for a public, active, and welcoming Robinson Terminal South.

TAKE ACTION AND CONTACT CITY DEBY FILLING OUT THE FORM [HERE](#)

Sincerely,

AJ Jackson
